IAQ Annual – July 2022

Report In accordance with Board Policy P7421 Indoor Air Quality Standards, and the statutes sited therein, the following actions were taken in accordance with Regulation R7421 for the school year 2023-2024:

- A preventive maintenance schedule for HVAC is in place
- Use of general and local exhaust ventilation is in place
- All HVAC systems are working properly
- All mechanical ventilation such as windows, doors, vents, stacks are operational
- During the school year 2022-2023 NO IAQ issues were reported.
- All required IAQ procedures during renovation, painting, or installation of carpet were followed
- Employees were notified at least 24 hours in advance of work involving air contaminants such as paint
- All appropriate maintenance records have been maintained
- During the 20/21 and 21/22 School years ALL HVAC equipment has be replaced with NEW.
- During the 2022 – 2023 school year all student/staff populated areas were supplied with Medify Air purifiers.
