

### 9190 COMMUNITY ORGANIZATIONS

The Board of Education respects the contributions to community life made by business, industry, labor, charitable organizations, cultural institutions, volunteer associations and other community groups that enrich the educational potential of the community.

The Board directs the Superintendent to be alert to the opportunities for an educational program expanded and enriched by utilization, both within and without the school district, of a diversity of community resources.

The district shall also take advantage of the physical and financial resources of the community and other organizations including business when such facilities or locations provide learning and enrichment opportunities not otherwise available to our pupils. Pupil safety shall be a primary concern in making use of such resources.

Approval for a visit from a community resource person must be obtained from the Building Principal and, whenever possible, the person will have been previewed by staff or the curriculum enrichment committee prior to the presentation.

Adopted: 28 November 2012
