- **Impactful stories and content**
- **Tools and resources**

According to the CDC's National Youth Tobacco Survey, 1 in 5 high school students reported used of vapes in the past month. The expectation is that growth will continue.

A current national survey result indicates that by the time they graduate high school, 45.5 percent of U.S. teens will have tried marijuana at least once. Marijuana is linked to school failure, lower income, and poorer quality of life, and to some mental illness.

Deaths from overdoses reached a staggering 100,300 in the 12-month period ending in April 2021. This represents nearly a 30% increase over the previous time period and was largely driven by fentanyl.

### What attendees are saying about our vaping, marijuana, and fentanyl presentation

*"Last night was a very informative seminar held at Warner Middle School. I walked away with more knowledge and learned about things I had no idea about. We as Parents need to be involved...overly involved in our children's lives."*

- Carrie F. (Parent)

*"My middle schooler came home after seeing the vaping assembly at his school. He said, 'Dad, did you know that marijuana and vaping are addictive, and like three grains of fentanyl can kill you?' Thank you for keeping our kids safe!"*

- Geoff B. (Educator)

## The Student Assembly for Middle and High School

This eye-opening 45-minute assembly for 6th through 12th- grade students will challenge their preconceived notions about the safety of vaping, marijuana, and counterfeit prescription drug use.

This thought-provoking assembly will also include the current scientific research on the effects of vaping and marijuana on the adolescent brain.

Common myths that teens have about marijuana and its derivatives will be discussed. We will address the Fentanyl poisoning/overdose epidemic, which is a direct result of teens purchasing what they believe are "safe" prescription pills but are actually counterfeit pills laced with Fentanyl.

This presentation will answer: 1. What is vaping; 2. What's in vapor and how it is dangerous; 3. The effects of marijuana on growing brain; 4. Epidemic of counterfeit pills and Fentanyl; 5. Why Fentanyl is so dangerous; and 6. Refusal skills.

## The Parent Seminar

This 90-minute, engaging and eye-opening presentation about the current teen vaping and marijuana epidemic. It will reveal the vape and marijuana industry's strategy to market their addictive product to teens and how parents and educators can counter their deceptive message with science-based fact. We will also discuss the epidemic of teens accidentally overdosing on Fentanyl laced pills.

This presentation will answer: 1. What is vaping; 2. How is vaping linked to marijuana use; 3. marijuana use on a child; 4. What is Fentanyl and why is it so dangerous; 5. How teens are buying drugs online; 6. How to talk to your child about vaping, marijuana, and Fentanyl; and 7. How to monitor my child's online use and prevent drug online purchases.

## About Total Safety Solutions and Cyber Safety Cop™

Total Safety Solutions, owned and operated by Clayton Cranford, delivers training, speaking and consultancy worldwide in the field of internet safety, cyberbullying, behavioral threat assessment, violence prevention, and school safety. Clayton is the nation's leader in the field of safety education delivered to schools, public groups, corporate teams and government organizations in the workplace, and at conference or seminar environments. Clayton, the 2015 National Bullying Prevention Award winner, is also the author of the acclaimed book, "Parenting in the Digital World, A Step-by-Step Guide to Internet Safety."

Our simple yet powerful advice will have a positive impact on how your family lives and schools operate within an uncertain world.
