

INSTRUCTIONAL GOALS AND OBJECTIVES

The purpose of our educational program will be to provide a solid foundation in the fundamental skills with emphasis on the application of the skills in making sound judgments, in developing rational thought processes and toward self-directed learning. We will seek to provide as broad and enriched a total program as facilities, talent, and resources permit. The board is aware of the critical importance of home atmosphere and parental attitudes to the success of an educational program and will foster close cooperation and understanding between the school, the parents, and the students. The board will provide leadership in interpreting to the community the educational program and will be responsive to the educational needs, aspirations, and priorities of the citizens.
